

# TRUWAVE MFX

## WAVE DRIVER total Drive

### MADE IN USA

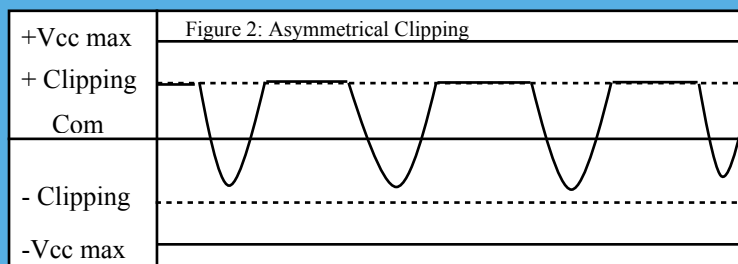

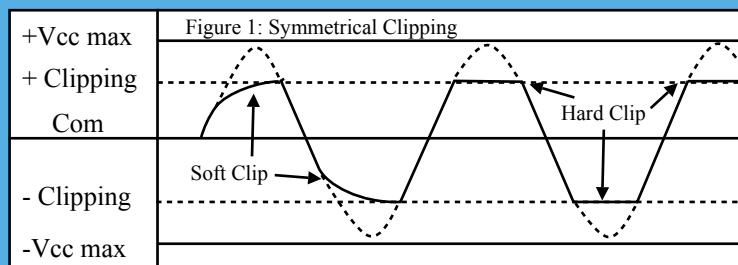

### FEATURES:

- UNIQUE CRASH CONTROL PRODUCES OVERDRIVE AND FUZZ TONES
- UNIQUE CREST CONTROL PRODUCES TONES FROM SOFT DRIVE TO HARD DISTORTION
- DIAL IN ANY DISTORTION TONE YOUR GUITAR COULD DESIRE WITH DYNAMIC, FAT SOUND
- RINGING CHORD HARMONIES
- FET INPUT DESIGN ARCHITECTURE WITH CONSISTENT TONE FROM PEDAL TO PEDAL
- TRUE BYPASS
- 9 VOLT, LOW NOISE SUPPLY PRODUCING CONSISTENT SOUND THROUGH OUT BATTERY LIFE.
- DIE CAST ALUMINUM CASE

### INTRODUCTION

NEW FROM **TruWave FX** COMES THE **WAVE DRIVER** TOTAL DRIVE PEDAL FEATURING OUR STATE OF THE ART TRU CLIP DESIGN TECHNOLOGY WITH **UNSURPASSED CLIPPING CONTROL** IN THE INDUSTRY. YOU CAN NOW DIAL UP ANY DISTORTION TONE YOUR FINGERS DESIRE. ENJOY THE SMOOTH TONES OF OVERDRIVE THEN WITH A QUICK ADJUSTMENT SHRED YOUR WAY INTO HEAVY METAL HELL! TICKLE YOUR EARS WITH EVERY TONE FROM THE SINGING HARMONICS OF FUZZ TO THE CLASSIC WARMTH OF TUBE DISTORTION ALL AT YOUR FINGER TIPS. **YOU'VE HEARD ALL THE HYPE, NOW HEAR THE TONE!**

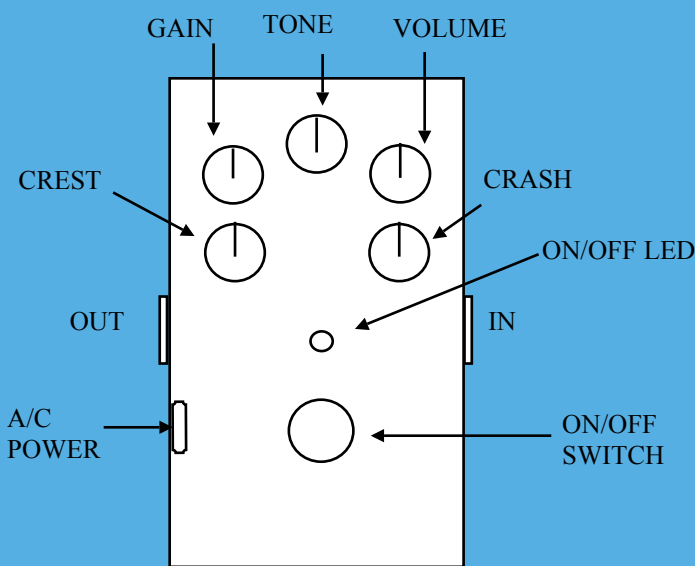

Above are two examples of a distorted signal. Note the signal being clipped at the + and - clipping thresholds. Our Tru Clip Design Technology allows you to clip the signal against stable, controllable thresholds. This technical achievement produces unique high quality sounds and is able to replicate many drive tones. **The musician is in control.** Figures one and two also illustrate the function of the unique Crash / Crest controls, from perfectly symmetrical to extremely asymmetrical, while also demonstrating soft and hard clips, giving you great control over your distortion.

### THE TECHNOLOGY

Unwanted noise occurs from a multitude of sources for which most current design architectures don't account. Our engineers at TruWave FX have the experience needed to deliver the best technology at a price and performance unmatched by our competitors. Other pedals have inefficient bipolar transistors with low head room that rely on clipping against unstable voltages, not accounting for battery condition, transistor variations, AC power interference, or electrically noisy environmental conditions. **DON'T RELY ON GETTING** a good transistor from the lot of many bad ones. Get the new, completely analog, 21<sup>st</sup> Century design architecture that works steadily with low battery voltage, as well as AC power. The sound produced is truly music to your ears. TruWave FX pedals deliver consistently superior performance. **WE GUARANTEE IT! If you don't like what you hear, simply return the pedal within 30 days for your money back.**

### CONTROLS

- GAIN:** Controls a wide gain range
- TONE:** Controls the tone sweep
- VOLUME:** Controls volume range
- CRASH:** Controls the symmetry and flattening of the signal
- CREST:** Controls the shape of the clip from hard to soft

### HOW IT WORKS

The **WAVE DRIVER** total drive pedal offers a high gain stage with full control over your distortion tones. Our unique Crash / Crest controls allow the user to have total control over the clipping. Using the crash control will adjust the clip from a symmetrical overdrive / distortion sound to an asymmetrical dirty fuzz. The crest control will produce tones of the soft clip of overdrive, the sharp clip of distortion, the hard clip of fuzz, and everything in between. These technical achievements give the player more control over their drive tone than ever. Add the tone control to enjoy frequencies from sparkly treble to deep bass and create any distortion sound you could desire. Pairing the **WAVE DRIVER** with your favorite tube amplifiers gain stage will perform stunningly well, providing distortion and sustain for days with brilliant chord harmonies. **HAVE A BLAST!**

*Tony Cataldo* Engineer/Founder

**List Price.....\$390.00**

### OTHER PEDALS BY TRUWAVE FX

#### WAVE CRASHER

The Wave Crasher Jr. offers a high gain, stable clipping with crash control producing overdrive and fuzz tones.

**List Price.....\$305.00**

#### RE-RUN DIGITAL DELAY

The Re-Run Digital Delay offers outstanding bandwidth and headroom with Tap Tempo

**List Price.....\$305.00**

#### 360 GAINER

The 360 Gainer is a simple to use, yet very effective gain pedal. Enjoy a wide gain range with no mud!

**List Price.....\$256.00**

#### WAVE SCREAMER

Enjoy the classic tones of rock and roll with a high gain stage and great midrange presence.

**List Price.....\$305.00**
